Del Mar, CA

EXECUTIVE SUMMARY

Consumer technical product manager owning acquisition and experimentation. At Tala, drove \$4.5M in incremental annual referral revenue & ran the attribution pipeline to Google and Meta, keeping CAC below \$40. AI-first prototypes: **Handbook** · [GitHub](#) | **Bridge** · [GitHub](#) | **Error Analysis of Stripe's Agent** · [Google Sheets](#)

CORE COMPETENCIES

Paid Acquisition & Attribution (Adjust) | A/B Testing (Split, feature flags) | 0-1 Product Launches | Funnel Optimization & Conversion | Data-Driven Decision Making (Python, SQL, Amplitude, Looker, Segment, Snowflake)

WORK EXPERIENCE

Ember Coding Lab · Consumer Education · Co-Founder - Product & Operations *Jul 2024 - Present*

Run a Saturday-only AI & coding lab for kids with an 82% six-month member retention and an 80% Sean Ellis PMF score. Designed a merit-based scholarship model funding 50% of seats while keeping the business profitable.

Tala · Consumer Lending · Lead Product Manager *Mar 2022 - Jul 2024*

Led global referrals, conversion attribution and 0-to-1 expansion bets for Tala's Mexico and Philippines markets.

- **Owned the first-party conversion attribution pipeline (Adjust → Google Ads/Meta)**, passing full-funnel lending events, from install to repayment, to optimize bidding, keeping CAC below \$40.
- **Pioneered referrals incentive driving \$4.5M in incremental annual revenue and a 50% increase in referrals.** Led end-to-end development from discovery to GTM. Built ROI and risk models that earned trust and approval by Credit, Legal and Finance partners, then ran experimentation at 6-week cadence.
- **Killed a two-way referral incentive** after cohort analyses revealed rewarded leads defaulted at higher rates than unrewarded ones, prioritizing long-term retention over short-term conversion.
- **Turned compliance requirements into a conversion win** by redesigning the onboarding flow to meet address verification and KYC standards while simplifying the UX, increasing E2E conversion to first loan.
- **Led two engineering teams on 0-to-1 development of an airtime top-up product**, doubling expected adoption without a banking license. Customers could apply Tala loans toward airtime purchases.

Farmstead · Consumer E-Commerce · Product Manager *Aug 2020 - Sep 2021*

- **Tripled North Carolina funnel conversion** by running A/B tests to identify highest-conversion placement of products on listing pages and landing pages.
- **Released route planning product for drivers** to lower costs while maximizing their earnings per hour.

Other Technical Roles

- (2016-2019) **Co-Founder at Coder Kids:** Bootstrapped a subscription-based in-person coding education business to \$850K+ ARR across memberships, 30+ school partnerships, serving 5,000+ students in five states.
- (2015-2016) **Technical Consultant at Appian:** Built B2B workflow automation software for government agencies, supporting 100K+ users across highly regulated environments.
- (2014-2015) **Software Engineer at Booz Allen Hamilton:** Developed Java and Python automation solutions for the Defense Information Systems Agency, reducing processing time of a security risk analysis workflow by 90%.

EDUCATION & AWARDS

The George Washington University

BA in Computer Science · Gates Millennium Scholar · awarded \$250K merit-based scholarship

2026 Data Science Alliance Hackathon at UCSD, 3rd Place

Led a team of six and built a capacity planning app for the San Diego Food Bank
